BLOOD BANK GIT CONTRIB HANDOUT

No-Conflict Branching Strategy: 1 Developer = 1 File (120 Commits)

Group Guidelines: To prevent merge conflicts, each member is the exclusive owner of their file.

DAGIM (dagi931)

Assigned File: **backend/src/index.js**

Feature Branch: *git checkout -b feat/register-hms-routes*

```
[backend/src/index.js] 1. init: add skeleton import for hmsRoutes at top of file
[backend/src/index.js] 2. config: load dependencies and express app context
[backend/src/index.js] 3. route: mount hmsRoutes middleware under /api/hms namespace
[backend/src/index.js] 4. route: register adminRoutes mounting point
[backend/src/index.js] 5. route: register authRoutes mounting point
[backend/src/index.js] 6. route: register stationRoutes mounting point
[backend/src/index.js] 7. route: register labRoutes mounting point
[backend/src/index.js] 8. route: register warehouseRoutes mounting point
[backend/src/index.js] 9. route: register hospitalRoutes mounting point
[backend/src/index.js] 10. route: register donorRoutes mounting point
[backend/src/index.js] 11. route: register root heartbeat endpoint handler
[backend/src/index.js] 12. socket: initialize socket.io integrations
[backend/src/index.js] 13. socket: attach socket server instance to app setting
[backend/src/index.js] 14. socket: bind socket client connection logs
[backend/src/index.js] 15. socket: bind socket client disconnection event handlers
[backend/src/index.js] 16. middleware: setup cors configurations rules
[backend/src/index.js] 17. middleware: setup express json body parser rules
[backend/src/index.js] 18. middleware: define global error handler catch-all middleware
[backend/src/index.js] 19. server: bind http server listener port configuration
[backend/src/index.js] 20. docs: add comments documenting route registration order
```

BEKAM (bekamdawit333)

Assigned File: **backend/prisma/schema.prisma**

Feature Branch: *git checkout -b feat/prisma-schemas*

```
[backend/prisma/schema.prisma] 1. init: define postgresql datasource provider database
configuration
[backend/prisma/schema.prisma] 2. model: define base User model fields and map users
table
[backend/prisma/schema.prisma] 3. model: add status and role fields to User model
definition
[backend/prisma/schema.prisma] 4. model: define base Donor model profile metadata fields
[backend/prisma/schema.prisma] 5. model: add user_id foreign key relation to Donor model
[backend/prisma/schema.prisma] 6. model: define BloodSample model fields for testing logs
[backend/prisma/schema.prisma] 7. model: add patient_id relation link to BloodSample
model
[backend/prisma/schema.prisma] 8. model: define WarehouseStock model schema with unique
constraints
[backend/prisma/schema.prisma] 9. model: define HospitalRequest model with default
pending status
[backend/prisma/schema.prisma] 10. model: define SentSmsLog database schema configuration
[backend/prisma/schema.prisma] 11. model: define EmailVerification model for
transactional OTPs
[backend/prisma/schema.prisma] 12. model: define Announcement schema for donation
campaigns
[backend/prisma/schema.prisma] 13. model: define HospitalStock schema with hospital
relation keys
[backend/prisma/schema.prisma] 14. model: define HospitalInterRequest table model
relationships
[backend/prisma/schema.prisma] 15. model: define AuditLog table model schema config
[backend/prisma/schema.prisma] 16. model: define Appointment model fields mapping to
donor fayda
[backend/prisma/schema.prisma] 17. model: define SmsQueue schema parameters
[backend/prisma/schema.prisma] 18. model: define Patient hms model schema in main db
[backend/prisma/schema.prisma] 19. model: define BloodOrder hms model schema in main db
[backend/prisma/schema.prisma] 20. db: add database index constraints declarations on
```

BLOOD BANK GIT CONTRIB HANDOUT

DANIEL (Daniel1698-w)

Assigned File: **backend/src/controllers/hmsController.js**

Feature Branch: *git checkout -b feat/hms-controller-logic*

```
[backend/src/controllers/hmsController.js] 1. init: import prisma mainDb client
configuration
[backend/src/controllers/hmsController.js] 2. feat: add skeleton admitPatient request
handler
[backend/src/controllers/hmsController.js] 3. feat: validate incoming patient
registration form payloads
[backend/src/controllers/hmsController.js] 4. feat: build new Patient record with
admitted status in database
[backend/src/controllers/hmsController.js] 5. feat: add skeleton getPatients dashboard
controller
[backend/src/controllers/hmsController.js] 6. feat: filter getPatients by current
hospital owner status query
[backend/src/controllers/hmsController.js] 7. feat: add getPatientById details search
resolver
[backend/src/controllers/hmsController.js] 8. feat: include blood orders history inside
patient details payload
[backend/src/controllers/hmsController.js] 9. feat: add skeleton dischargePatient query
handler
[backend/src/controllers/hmsController.js] 10. feat: update patient admission status to
discharged
[backend/src/controllers/hmsController.js] 11. feat: add createBloodOrder logic with
validation rules
[backend/src/controllers/hmsController.js] 12. feat: query hospitalStock record to
verify local availability
[backend/src/controllers/hmsController.js] 13. feat: create full local fulfillment
branch with decrement update
[backend/src/controllers/hmsController.js] 14. feat: create partial local stock
decrement and calculate shortfall
[backend/src/controllers/hmsController.js] 15. feat: create hospitalRequest for partial
order shortfall
[backend/src/controllers/hmsController.js] 16. feat: create hospitalRequest for full
order shortfall
[backend/src/controllers/hmsController.js] 17. socket: emit requisition_updated
websocket payload on full request
[backend/src/controllers/hmsController.js] 18. socket: emit requisition_updated
websocket payload on partial request
[backend/src/controllers/hmsController.js] 19. feat: add getBloodOrders list query
filtered by hospital ID
[backend/src/controllers/hmsController.js] 20. feat: add markTransfused and
cancelBloodOrder status managers
```

EBISA (Ebisa-Mitiku)

Assigned File: **frontend/src/services/api.js**

Feature Branch: *git checkout -b feat/frontend-api-client*

```
[frontend/src/services/api.js] 1. init: setup api backend base url configuration
[frontend/src/services/api.js] 2. auth: add api.auth.login network fetch request
[frontend/src/services/api.js] 3. auth: add api.auth.registerVerifyEmail validation
request
[frontend/src/services/api.js] 4. auth: add api.auth.verifyCode verification query
[frontend/src/services/api.js] 5. auth: add api.auth.registerComplete payload submission
[frontend/src/services/api.js] 6. auth: add api.auth.faydaLookup demographics query
[frontend/src/services/api.js] 7. auth: add api.auth.forgotPassword code dispatcher
[frontend/src/services/api.js] 8. auth: add api.auth.resetPasswordDonor password updater
[frontend/src/services/api.js] 9. admin: add api.admin.getUsers registry fetcher
[frontend/src/services/api.js] 10. admin: add api.admin.updateUserStatus registry status
updater
[frontend/src/services/api.js] 11. admin: add api.admin.getAnalytics report compiler
[frontend/src/services/api.js] 12. admin: add api.admin.triggerReminders reminders
initiator
[frontend/src/services/api.js] 13. admin: add api.admin.getAuditLogs records query
[frontend/src/services/api.js] 14. admin: add api.admin.getPasswordResetRequests ticket
query
```

[frontend/src/services/api.js] 15. admin: add api.admin.resolvePasswordReset ticket resolution handler
[frontend/src/services/api.js] 16. station: add api.station.lookupDonor and registerDonor services
[frontend/src/services/api.js] 17. station: add api.station.createSample and getSamples endpoints
[frontend/src/services/api.js] 18. lab: add api.lab.getPendingSamples and submitTestResult endpoints
[frontend/src/services/api.js] 19. hms: add api.hms.admitPatient and getPatients hms methods
[frontend/src/services/api.js] 20. hms: add api.hms.createBloodOrder and markTransfused hms methods

DESALEGN (DesuTaresa)

Assigned File: **frontend/src/pages/auth/Login.jsx**

Feature Branch: *git checkout -b feat/login-recovery-ui*

```
[frontend/src/pages/auth/Login.jsx] 1. init: import react and useState hooks in Login.jsx
[frontend/src/pages/auth/Login.jsx] 2. icon: import logIn and ArrowRight icons from
lucide
[frontend/src/pages/auth/Login.jsx] 3. icon: import Key and X icons for recovery modal
styling
[frontend/src/pages/auth/Login.jsx] 4. ui: render login card structure wrapper layout
[frontend/src/pages/auth/Login.jsx] 5. ui: render email input secure text field control
[frontend/src/pages/auth/Login.jsx] 6. ui: render password input secure text field
control
[frontend/src/pages/auth/Login.jsx] 7. ui: add forgot password link alignment under
password input
[frontend/src/pages/auth/Login.jsx] 8. state: bind login onSubmit event to
authentication api call
[frontend/src/pages/auth/Login.jsx] 9. ui: render forgot password overlay dialog box
wrapper
[frontend/src/pages/auth/Login.jsx] 10. ui: render account recovery email input layout
[frontend/src/pages/auth/Login.jsx] 11. ui: add request reset submission click event
handler
[frontend/src/pages/auth/Login.jsx] 12. ui: display workstation ticket request
submission success message
[frontend/src/pages/auth/Login.jsx] 13. ui: render donor verification OTP code text
input field
[frontend/src/pages/auth/Login.jsx] 14. ui: render donor new password secure text input
field
[frontend/src/pages/auth/Login.jsx] 15. ui: render donor confirm password secure text
input field
[frontend/src/pages/auth/Login.jsx] 16. state: bind recovery inputs to update donor
credentials API
[frontend/src/pages/auth/Login.jsx] 17. ui: show validation warning on recovery password
mismatch
[frontend/src/pages/auth/Login.jsx] 18. ui: display donor password update completion
success banner
[frontend/src/pages/auth/Login.jsx] 19. state: clear forgot password modal states on
dialog close
[frontend/src/pages/auth/Login.jsx] 20. ui: style login submit button states and loading
spinners
```

DESTA (hailedesta60-glitch)

Assigned File: **frontend/src/pages/dashboards/HospitalDashboard.jsx**

Feature Branch: *git checkout -b feat/hospital-hms-view*

```
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 1. init: import package, truck,
search and stethoscope icons
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 2. state: add hmsPatients and
hmsOrders list state arrays
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 3. state: add showAdmitForm and
showOrderForm boolean states
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 4. state: add admitForm input
payload values state object
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 5. state: add orderForm input
payload values state object
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 6. state: add orderFulfillmentMsg
status notification state
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 7. state: add hmsFilter query
selection tab state
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 8. query: add loadHmsData fetch
coordinator wrapper
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 9. query: bind loadHmsData
triggers to hms navigation tab click
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 10. ui: render main Patients &
Orders dashboard section container
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 11. ui: render admit patient popup
form overlays
```

[frontend/src/pages/dashboards/HospitalDashboard.jsx] 12. ui: render blood order placement form overlays
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 13. state: bind patient admission submit to admit API method
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 14. state: bind blood order submit to order creation API method
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 15. ui: render orderFulfillmentMsg details notification banners
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 16. ui: render admitted/discharged patients list split tab panel
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 17. ui: render active blood orders progress lists
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 18. ui: add markTransfused click handler triggers to dispatched orders
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 19. ui: add cancelBloodOrder click handler triggers to pending orders
[frontend/src/pages/dashboards/HospitalDashboard.jsx] 20. ui: add responsive layout styling for HMS database rows
